BY LINCOLN ROTHSLUM.

It was the coldest night Boston had had in many years. Two days' snowfall, accompanied by a freak blizzard sweeping down from Newfoundland, had buried the entire city in a heavy blanket of white. It was but nine o'clock this Saturday night, and the elements, unrestrained, played at will in the empty streets.

Dorts, wrapped up in a bathrobe of carmen-colored corduror, pushed the bassock closer to the fire and snuggled in the comfortable warmth of the burn-

"Just a year ago tonight," she mur-mured dreamly, "but it was not so

"Come, sis," remonstrated a comely lad of sixteen, who squatted Indian fashion, close by her, "you mustn't always figure how long it is since that day. I'm big enough to how what men do, and I'll bet my new rife Stanley Chalmers ain't ng coward. What'll you bet?"

The boy extended his cramped legs, and cocking them up before him, clasped his hands about his knees. He knew he would again hear the antire account of why his sister broke her engagement with Stanley Chaimers and he wented to be comfortable during the recital.

"It was not so cold as it is tonight," Doris began, as if reciting a welllearned lesson, "when we turned the corner of Dorchester and Saxton streets. He had just been telling me he would protect me from all ill, when a horrible-looking fellow bumped inta me and swore out a terrible oath. I surely expected Stanley would knock him down, but all he did was grab my arm and hustle me off."

"When we got home," she continued, pulling the bathrobe closer about her, "you were in the hall and heard me tell him I could never marry a cow-

"Aw. I guess I'll get some more wood," Bob answered practically, and in an effort to change the subject, "the fire's dying down."

In a few moments Bob returned from the kitchen, his arms laden with roughly chopped pine boughs. As he crossed the threshold between the two rooms and stopped to adjust his burden, from the upper regions of the house a terrific crash reverberated. The wood dropped from his arms and he dashed across the room swiftly to his sister. "What is it?" his lips formed the

words his voice refused to utter. "We must see who it is," she whispered, thoroughly frightened, and grasped the rod used to stir up the

Legal Pun.

"A petition for an injunction, based upon a somewhat doubtful assertion of fact," says a New York lawyer, "came before one of the justices of the supreme court of this state. After con-sideration of the affidavit of the petitioner the justice remarked: 'In this case an injunction will not lie, even if the relator does." -- Case and Com-

Varieties of Golden i.od.

It is said by many persons that the andsomest of the rods is that which s called Canada golden rod. The ower cluster is very large and plumeike. Next to it is that plant which s called the showy golden rod. It is righter yellow than many of the speles and the flower cluster is plumeike. The lace-leaved golden rod s so different from many other common species that a person can hardly full to notice it. The flowers are crowded together, are small and dull yellow.

Earliest Form of Shoes.

The earliest shoes known were sandals of hide, leather or wood. When one encounters the word "shoe" in the Bible he may be sure that it is the sandal that is commonly meant. In Egypt the sandal was woven of palm leaves and papyrus. As a symbol of the subjection of their enemies the Egyptians often painted the figures of their opponents on the lining of their eandals.

Proserving Spiders' Webs. In order to preserve spiders' webs,

naturalists employ an ingenious meth-"Didn't I tell you he was brave!" od. The webs are first sprayed from an atomizer with a thin solution of artists' shellac, and then, should they be of the ordinary geometric form, they syes of soft brown and gently asked:
"But, Stan, won't you explain about a year ago?"

The man squared his shoulders. "I shellac solution has dried the plates knew that the fellow wouldn't hart carrying the webs can be stored away

Let us see how many varieties of nuts we would have. We will begin at this end of the class." Walnut, beechnut, chestnut, were named In rapid succession, but when It came Mary's turn she wrinkled her brow and thought for a long minute before she answered: "I believe I'd plant a doughnut tree."—Cleveland Plain

Concerning Patents,

The length of time it takes to obtain a patent depends partly on the nature of the application, that is, the thing to be patented, and partly on the skill with which the case is presented. There are forty distinct divisions in the patent office, each division having in charge a specific class or variety of work. Fach application is examined in the order of filing and some of the divisions are considerably behind in their work. An application may be acted on promptly or only after weeks or months.

Good Advice.

The man who doesn't worry when he ought to is as bad as the one who worries when he shouldn't. Worrying is bad for the health, but probably not as bad as letting things drift. In case of rain, run for an umbrella. Instead of saying: "Don't worry," the best advice to give a man is "Get busy."-Thrift Magazine.

"Indestructible Union."

The expression "an Indestructible union of indestructible states" was used by Salmon P. Chase in a decision rendered by him when chief just tice of the Supreme court. The case came up from Texas and involved the right of secession and the question of whether Texas was ever out of the Union. The court declared that the Union was intended to be perpetual, and in emphasizing the iden the bick justice said: "The Constitution, n all of its provisions, looks to an indestruct tible Union, composed of indestruct tible states."
